

# AUDIOPLAYER

## Version 1.3

Bug fix:

- Increase performance on transition between viewcontroller (thank's to lasblo)
- Add “NULL” options to NSMutableDictionary in MPNowPlayingInfoCenter

## Version 1.2

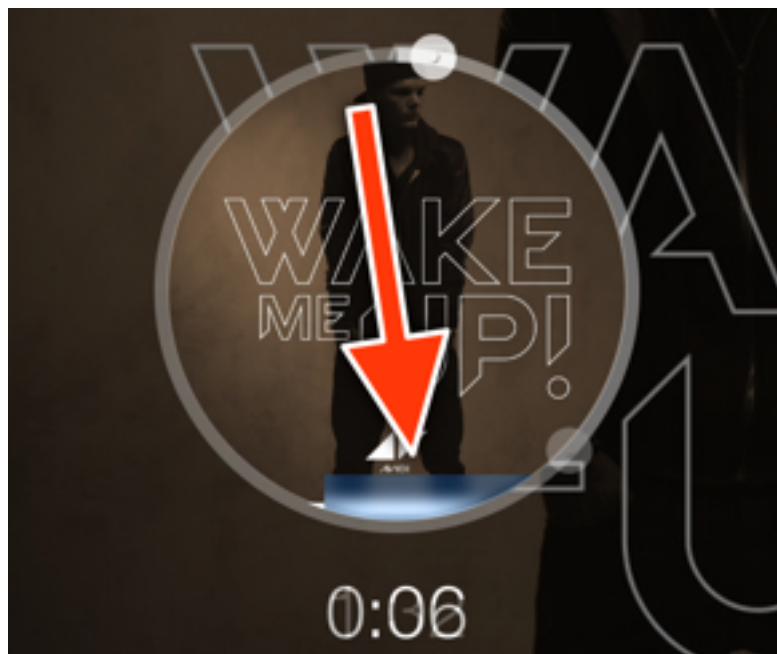

Implementation:

- Add ore Remove the Blur effect.

Bug fix:

Solved UI Issue (thanks to **justinheintz**)

*“I’m having a UI issue and can’t seem to find out how to fix it. There’s a blue rectangle in the album artwork.”*

## Version 1.1

### Implementation:

- **NEW: Songs TableView**

Create a tableview with the songs lists. The view contain this features:

- Background with the blur song cover
- Add songs from lists
- Play selected song
- PlayerViewController
  - Added the feature to play a song in the list of thumbs (scrollview only to iPhone 5 +)
  - Hidden left and right arrows when the playlists are started or finish

### Bug fix:

Solved the problem of cloud songs.

I've added the line in "PRViewController.h"

```
mediaPicker.showsCloudItems = NO;
```

## Version 1.0

Audioplayer is ready for use - comes with a music player and iOS 7 support.Xcode Project
